SUMMARY

Junior web developer and cybersecurity enthusiast with 1 year of personal experience. Proficient in Node.js, Express, JSON, and React, specialising in secure digital environments. Launched e-commerce marketplace, implemented Auth0, developed SecureSync and contributed to cybersecurity projects. Eager to develop skills and contribute to dynamic team projects.

SKILLS

Cyber Security ///// Front-End Development ///// Project Management ///// Customer Service ///// Javascript/Python /////.

EXPERIENCE

Full Stack Developer

Hdev Group, Remote - Freelance

May 2023 - Present

- Designed and launched a fully functional e-commerce marketplace, emphasising user experience, responsiveness, and security measures.
- Developed a cryptographic website focused on securing files with AES 256-bit encryption.
- Implemented Auth0 for streamlined user management and incorporated two-factor authentication as a standard for enhanced security while working with API's.
- Collaborated with a cross-functional team of developers to ensure a diverse and unbiased site design.
- Collaborated with the team to address security concerns, applying best practices in cyber fraud prevention and scams while using secure coding practices.

Team Member

Chipmunk, On-Site - Part Time

August 2023 - Present

- Collaborated with team members to streamline operations and ensure smooth service during peak hours
- Adapted to flexible scheduling to accommodate peak business hours and special events
- Received positive feedback for maintaining a friendly and positive demeanour

PROJECTS

[SecureSync](#)

- Developed a Cryptographic website to secure files under AES 256 bit encryption.
- Implemented Auth0 for easy user management and authentication 2 factor authentication as standard for logging on.
- Integrated cloud storage from my web page to AWS S3 Storage.
- Enhanced security using express-openid for easy user identification and security.
- This project has industry standard coding and secure coding practices.

[Hexxa](#)

- Implemented user authentication, product listings, and checkout functionality.
- Enhanced security using express-openid for easy user identification and security.
- Collaborated with other developers to ensure no biases on the site's design.
- This project has industry standard coding and secure coding practices.
- Tech Stack: Node.js, Express, JSON, React

Personal Experience - Personal

February 2022 - PRESENT

DDoS Mitigation:

- Implemented DDoS mitigation strategies for personal websites to ensure uninterrupted online presence.

IT Support

- Assisted in fixing software and hardware on windows vista/xp/7/10/11. Set up active directory. Installed Networks / Components.

Cyber Security

- Conducted training on identifying and addressing various types of malicious software and social engineering.
- Actively engaged in Security Engineering for personal projects

CERTIFICATIONS

[Google Cyber Security Professional Certificate, Coursera](#)

September 2023.

Networking Basics, CISCO

January 2024.

EDUCATION

St Helens College, St Helens - Level 3 Information Technology

September 2023 - July 2025.

Cowley International College, St Helens - GCSE - Level 2

September 2018 - July 2023.

- Achieved 5's (B) In Maths, English, Science, History. Along with a Distinction in Information Technology followed by Merits in Engineering and Construction.
